

Level 3 Energy Manager Apprenticeship

Develop Energy Management Expertise | Reduce Environmental Impact | Gain a Recognised Qualification

This apprenticeship is designed to equip individuals with the skills to monitor, manage, and optimise energy use within organisations.

This programme is ideal for those passionate about sustainability, cost reduction, and environmental responsibility.

Energy Managers play a crucial role in helping businesses reduce carbon footprints, comply with regulations, and implement energy-saving initiatives.

About the Apprenticeship

The Level 3 Energy Manager Apprenticeship provides hands-on experience and industry-recognised training in energy management and sustainability.

- **Duration:** 18 months
- **Delivery:** Work-based learning, online modules & practical energy assessments

What You Will Learn

- **Energy Management Fundamentals:** Understand energy consumption, carbon reduction, and sustainability principles
- **Data Analysis & Monitoring:** Track energy performance and identify efficiency opportunities
- **Sustainability & Compliance:** Ensure legal and regulatory adherence in energy management
- **Cost-Saving Strategies:** Implement energy-saving initiatives to drive business efficiency

Who is it for?

- Aspiring or existing staff working in facilities management, sustainability, or energy roles
- Individuals keen to reduce environmental impact and improve energy efficiency within their organisation
- Those looking for a rewarding career in energy management, sustainability, or compliance

Career Progression

- Pathways into Level 4 and 5 energy management qualifications
- Career opportunities as an Energy Manager, Sustainability Officer, or Environmental Consultant
